Update on NMISA radioactivity standards lab activities since 2020

Monday, 16 May 2022 12:15 (20 minutes)

An update on the NMISA RS lab activities since the start of 2020 will be provided. This comprises international comparisons of activity measurements using primary methods, participation in proficiency tests using gamma-spec and liquid scintillation counting, and low-level comparisons. An update on our scope of accreditation will also be provided and various types of client work that has been completed. Future plans will also be discussed.
