

Conference dedicated to the late **Dr. Daniel Adams** to whom we owe the establishment of particle Physics in South Africa.

With
Madeleine
Adams during
the TIPP2023
dinner.¹

Want to thank the Minister for making the effort to open TIPP2023

Minister's speech

Report on TIPP2023 was by the largest national TV broadcaster during prime time. Coverage by several newspapers as well.

[Link to TV coverage](#)

And all thanks to you for coming all the way to South Africa!

IUPAP C11, Particles and Fields, is solicit applications from institutions interested in hosting the International Conference on Technology and Instrumentation in Particle Physics (TIPP) in 2026.

Interested parties should contact the
C11 Chair – Florencia Canelli (florencia.canelli@cern.ch) and
TIPP Steering Committee Chair – Maxim Titov (maxim.titov@cea.fr).

The deadline for applications is December 15, 2023.

The TIPP conference series, a science-driven cross-disciplinary conference, started in Tsukuba, Japan in 2009 and have been alternating every third year between America, Europe and Asia: Chicago (2011), Amsterdam (2014), Beijing (2017), Vancouver (2021, online), Cape Town (2023). The conference usually attracts more than 500 attendees. The program focus is on the technology, detector development and instrumentation in particle physics, astro-particle physics and closely related fields. The application should contain the information about the participating institutions, the local organizing committee, conference facilities, the budget and the expected level of local support. A brief description of recent large international conferences hosted by the organization team is also relevant.

Please see: <https://iupap.org/commissions/c11-particles-and-fields/c11-conference-guidelines/> for the full conference guidelines.
