The 2nd International African Symposium on Exotic Nuclei IASEN2024

Contribution ID: 81

Type: Oral

## Development of a detector system at ACCULINNA-2 fragment separator

A.A. Bezbakh1 for Acculinna-2 collaboration

1 Flerov Laboratory of Nuclear Reactions, JINR, 141980 Dubna, Russia

Modern detector systems of light charged particles (E~1÷45 AMeV) and neutrons (E<30 MeV) for the experiments with radioactive beams at ACCULINNA-2 fragment-separator were designed and developed [1-4]. Using such technique new information about low energy spectra of the several neutron rich nuclei 7H, 7He and 8,9Li was obtained [5-7]. Main characteristics of these detectors and its future application are presented.
