

Dear Honorable Committee

I am writing to express my strong motivation to participate in the sixth workshop on Advanced Nuclear Science and Technology Techniques, scheduled to take place at iThemba LABS in Cape Town from the 18th to the 22nd of May 2026.

As a developing researcher in nuclear science, I find the workshop's emphasis on nuclear experimental techniques, data analysis, and environmental measurements resonates with my interests.

I am eager to participate by contributing to the discussions and benefiting from the lectures, poster presentations, and roundtable sessions offered through the workshop's hybrid format. Moreover, the ANSTT6's emphasis on networking, Memoranda of Understanding, and the spirit of collaboration are the aspects of the workshop that excite me the most, given their importance to the development of research collaborations in the region, particularly Sub-Saharan Africa.

In addition, the workshop's inclusion of the SPAMs workshop, offered by SAINTS, is of particular interest to me, given the importance of spectrum analysis and data manipulation, skills that are critical to my recent study.

I want to request consideration for one of the bursaries allocated to young researchers, given the importance of the workshop's activities to my development as a researcher.

I appreciate your consideration.

Sincerely,

AOH Ahmed
