

## Recent Research Activities and Perspectives for Collaboration

*Tuesday, 19 May 2026 12:40 (20 minutes)*

A brief overview will be given of ongoing research directions at Laboratoire de Physique Corpusculaire de Caen related to environmental radiation measurements and the development of innovative portable low-cost detector systems for environmental monitoring applications. Possible avenues for future collaboration between the South African and French teams in this field will also be discussed.

**Presenter:** Dr BAHINI, Armand (University of Caen Normandie / Laboratoire de Physique Corpusculaire Caen (LPC Caen))

**Session Classification:** Environmental Measurements
