

The Future of ALICE

Monday, 1 December 2014 10:45 (45 minutes)

The ALICE experiment at the LHC is continuing its harvest of results from RUN1, while preparing for the second LHC RUN which will start next spring. In parallel, we are preparing for the long-term future, with a major upgrade to be installed during LS2 and which will allow a rich physics program in RUN3 and RUN4 of the LHC. The main items will be reviewed.
