

Till the supersymmetric path? To tread or not to tread?

Tuesday, 2 December 2014 10:00 (45 minutes)

The existing status of supersymmetry (SUSY) will be surveyed, with emphasis on the LHC data. The main line of discussion will be: (a) a quick recapitulation of the desirability of SUSY, (b) The viability of testable supersymmetric scenarios in view of current data, and (c) certain possibilities that are less emphasized in most discussions.
