## **Higgs Properties and Measurements in ATLAS**

Wednesday, 7 December 2016 12:00 (45 minutes)

The LHC has delivered a large amount of data at a center of mass energy of 13 TeV.

The experimental sensitivity with this data set is equivalent to the one from run-1 for the Higgs boson (125 GeV),

and surpasses it for searches for higher mass Higgs-like particles. This talk will review recent ATLAS results on both of these topics.

## I intend to submit my contribution for the proceedings
